

## MARTIN DAVID DARCY

Mr. Darcy is a process engineer with a wealth of business and corporate development experience gained in major US and UK companies, covering waste management and construction. He has over ten years of experience in project financing including early experience of the United Kingdom's own Private Finance Initiative (PFI).

Mr. Darcy is engaged currently in the following activities: UK representative on PFI at the United Nations Commission on International Trade Law (UNCITRAL) and member of the Commission's Expert Group producing guidance on the legislative requirements for Privately Financed Infrastructure Projects; private sector advisor on the subject of PFI within Her Majesty's Treasury Procurement Group which develops all UK government procurement policy and establishes best practices guidelines; member of the Interdepartmental Working Group on PFI policy; advisor to the UK Department of Trade and Industry on Privately Financed Infrastructure Projects; member of the BOT Group of the UN Economic Commission for Europe, the body that examines the prospects for Privately Financed Infrastructure Projects in the emerging economies of Eastern Europe; adviser to FIAS, the World Bank/International Finance Corporation joint advisory facility on the investment climate for Project Finance transactions; and lecturer on PFI at the UK's Civil Service College and the College of Estate Management.
